MDPE

WATERCRAFT UP TO 3.5M OR 500KG

Specifications	
Dimensions	H: 30.5cm (12"); L: 3.86m (152"); W: 1.93m (76")
Weight	159 kg (350lbs)
Colours	Gray (other colours on special request)

KEY FEATURES

- Fully Adjustable Wheel Configuration
- Unsinkable 100% Foam-Filled
- Easy Berthing & Launching Maneuvers
- Starter Kit Includes:
 - 2 Hole Caps
 - 1 Bow Stop
- No Assembly Required
- Maintenance Free
- Compatible With All Types Of Docks

This single piece drive-on dock system was designed to accommodate all sizes of Personal Watercraft. The JetRoll is fully compatible with our G2 system as well as all other types of docks on the market. This MDPE unit is 100% foam-filled and literally unsinkable. Because no assembly is required, the installation is fast and hassle-free. The launching procedure of your watercraft is made easy; thanks to the 12 urethane wheels and their customizable positions.

STARTER KIT

BOW STOP

(2x) HOLE CAPS

MULTIPLE INSTALLATION OPTIONS

1 STAND ALONE

COMPLETELY AUTONOMOUS

Using an already proven method; Candock's piling system, you can easily and safely install your JetRoll in a "stand alone" configuration. Shallow waters and soft sea/lake beds are the best types of environments for this configuration.

2 CONNECTED TO A CANDOCK

SEAMLESS TRANSITION

Using the same hardware and fundamentals as our regular floating dock system (connecting pin through threaded tabs) you can easily connect your JetRoll to an existing Candock. Anchoring a JetRoll couldn't be simpler!

3 CONNECTED TO A FIXED STRUCTURE

SIMPLE AND EFFICIENT

Thanks to our "Z" Bracket, you can secure your JetRoll to any fixed structure (fixed pier, sea wall, etc...). Paired with our pilings and PVC sleeves, the combination allows for seasonal or tidal fluctuations of the water level, without compromising accessibility and efficiency.
