CUSTOM MODULAR FLOTATION SOLUTIONS

CHARACTERISTICS

Material/Composition :
High-density polyethylene resin

Colours :
Grey
Black (industrial use only)
Other colours by special request

Surface :
Anti-skid

Dimensions :
L x W : 48 cm (19") x 48 cm (19")
H : 36 cm (14")

Dimensions (low profile cube) :
L x W : 48 cm (19") x 48 cm (19")
H : 23 cm (9")

Weight :
Cube: 5,5 kg (12 lbs.)
Low profile cube : 5 kg (11 lbs.)

Floating capacity :
Cube: 272 kg per m²
Low profile cube: 210 kg per m²

Safe Working Load
Single Layer: 100 kg per m²
Double Layer: 372 kg per m²

THE CANDOCK MODULAR FLOATING SYSTEM

The Candock modular floating system is a truly revolutionary product! The era of massive wooden, metal and cement docks is over. Our high quality plastic system is environmentally friendly, and requires no maintenance. Easy to use and reliable, it provides unlimited configuration and application options. The Candock modular floating system has become a must for commercial and industrial applications. When compared to wooden, metal or cement alternatives, its advantages are crystal clear: just consider its exceptional lifespan and its high resistance to the most severe weather conditions.

Candock is not just a one-time expense and long-term investment - it's an experience!

ADVANTAGES

Unlimited number of potential configurations
This revolutionary system's floating cubes meet the precise needs of any shoreline, and can be assembled to create whatever shape and size you like. The configuration options are limitless.... It's all up to your imagination!

Easy and quick assembly
The Candock system is simple: the blocks are held together tightly and firmly with special connecting pins. All parts are lightweight and easy to handle.

Lightweight, sturdy and safe
The safety aspect of nautical products is critical. This is why the Candock system has undergone rigorous testing. Its safety features include excellent dock stability, high load capacity, an anti-skid surface and the absence of metal parts.

Environmentally friendly
The modular structure's components do not oxidize or deteriorate in any way. Thus, the environment where the dock is floating stays in its natural state.

Maintenance-free (100% plastic)
With the Candock system, the concept "maintenance-free" means ZERO maintenance – no more, no less. No more lost time, no more expense, and no more work to be done on a conventional wooden or metal dock year after year.

Pollution and UV resistant
Made of high density polyethylene resin, Candock cubes are remarkably resistant to impact, climate change, the adverse effects of water and the sun and a wide range of chemical products.
